

FUZZROCIOUS PEDALS

HELIOTROPIC

ABOUT

Ever wonder what gave Failure that killer tone on songs like “Heliotropic” or “Another Space Song”? Well, wonder no more! Here it is! We worked hard to dissect the sound that we loved and replicated it in this fuzz. HELIOTROPIC will give you the ability to replicate that tone and more. Not only can you achieve that tone, but you can dial in clanky, dirty tones as well as super doomy ones as well. It even slays on guitar!!!

CONTROLS

PREGAIN – determines how hard you will drive the second stage circuit inside the Heliotropic. Roll it clockwise to drive it more.

SUSTAIN – roll it clockwise to increase how fuzzy/sustained the fuzz will be.

VOLUME – makes the output of the circuit louder or quieter.

TONE – fully counterclockwise provides a clanky, trebly tone; fully clockwise provides a doomy, muddy, bassy tone.

POWER

Fuzzrocious Pedals’ products do not support batteries due to risk of damage to the unit and for ecological concerns related to the use and disposal of batteries. It is the customer’s responsibility to power the pedal with a 9V DC 2.1mm center negative tip adaptor that will not be provided by Fuzzrocious Pedals, LLC.

PAINT

All handpainted pedals, unless otherwise specified are painted with enamel or acrylic paint by Shannon Ratajski. Some pedals are painted by the Ratajski children. Powdercoating and screenprinting for pedals sold through dealers are done locally by Juxtaprints.
